

Tired of Outrageous Electric Bills During the Hot, Humid Richmond Summer?

Interested in saving 10-15% or more on the energy related portion of your electricity bill?

We Can Help!!

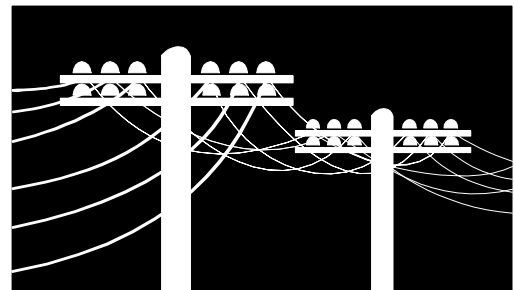

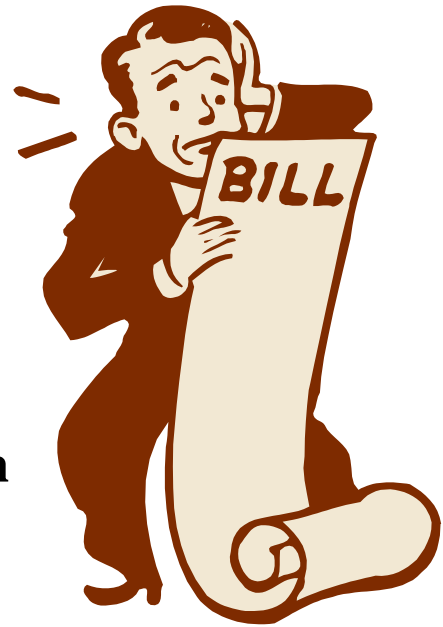

Energy Solutions has the answer. The typical air conditioner or heat pump loses **20% or more of it's** heating or cooling *efficiency* in as little as **10 months**. The result... higher electricity bills, costing you money!!

How does Energy Solutions save you money?

First, we remove built-up dirt, mold and efficiency-robbing corrosion from your air conditioner or heat pump's condenser coils. Then, using proven technology originally developed for NASA and adapted for HVAC equipment, Energy Solutions applies our patented "glass" coating to protect and improve your condenser coil's heat transfer rate while preventing further mildew, mold and corrosion. Now, you can start to feel the difference.

Call us today for:

1. *Better Heating & Cooling Efficiency*
2. *Lower Energy Bills*
3. *Reduced Maintenance*
4. *Longer Unit Life*
5. *Significant Energy Savings*
